The ROD indicates the project is consistent with existing environmental policies and objectives as set forth in the National Environmental Policy Act (NEPA) of 1969, as amended, and will significantly affect the quality of the environment.

In reaching this decision, the FAA has given careful consideration to: (a) The role of Cleveland in the national air transportation system, and the airport capacity/delay reduction needs; (b) aviation safety; (c) preferences of the airport owner; and (d) anticipated environmental impact.

Discussions of these factors are documented in the Draft Environmental Impact Statement, the Section 303c Evaluation, and the Final Environmental Statement (FEIS) for the project. The notice of availability of the FEIS appeared in the **Federal Register** on July 14, 2000 (65 FR 43748), and the commend period ran for ninety-four (94) days until January 31, 2000. The FAA's determinations on the project are outlined in the ROD, which was approved on November 8, 2000.
